Investigation done in my home

Posted by shanwvr88 - 17 Jul 2011 04:39

Hey just wanted to let everyone know that the Northeastern Paranormal Investigations group just finished doing their investigation of my home. As soon as they've completed evaluating all the evidence, I will post the findings. They did do a pendulum session and got some info from that. Can't wait to see the evidence.

I really wish I had a computer so i'm gonna see what I can do about uploading the evidence from the investigation. We caught some evps and a few pictures and we also had multiple K2 spikes and also spikes in response to questions. We also did a pendulum session as well and got responses that matched some of the claims of goings on in my apartment witnessed by myself and my young children. There is activity here but based on captured evidence we don't believe it to be malicious. Some other occurrences were that one digital camera went through 3and brand new sets of high quality batteries. She put them, turned the camera on and shot a pic and then the batteries died. Also one of the other handheld digital cameras that runs on a rechargable batteries was completely charged beforehand and when he turned it on it died. We also had a lightbulb decide to turn on by itself.

If you have some EVP's try to upload them in MP3 file format. That way they get the brand new sound file player I just added to the system. Makes viewing EVP's much nicer!
