Split Rock Quarry in Syracuse area of NY.

Posted by Keith - 28 Sep 2011 23:04

_____

This will be the first out door Investigation for me.

The history is that back on July 2nd 1918 the TNT factory that employed 600 people Blew up. 55 people perished that night and or subsequent days. There has been a long history of Paranormal activities there and mid-month next 5 of us will be paying the old quarry a visit. Our historian grew up a mile from the quarry and remembers the unsettling feelings she had there while exploring with her friends.

Could use some help on how to get the most out of the investigation. I'll probably pay a pre visit there to look around soon.

Thanks in advance for any advice.

Oh and Yes we have permission.

Keith
