For those who Do/Do Not believe in Orbs

Posted by iburyem - 25 Feb 2012 22:11

_____

Caught a few photos of light anomalies during an investigation Thursday evening, I'm not really a believer of "ORBS" , and think at least 2/3rds of the photos I see are dust, but these few have me puzzled, what do you think, dust or Orbs?

This is our second time at this home, we were called out as some of the occupants were complaining of being scratched.

We were very successful with catching cabinets opening/closing, very strong grade A EVPS, and LOTS of them in several different voices, but nothing very visual

==========
