

Feelings

Posted by melissa21775 - 22 Jun 2011 16:54

I was just wondering if someone could possibly explain something to me. I keep getting these strange feelings. Kind of like I'm super excited. It feels like I know something is going to happen but it never really does. Sometimes they come with dread and sometimes it's more of a happy feeling. The pit of my stomach goes crazy and I get really jittery. Does this happen to anyone else?
